<sup>1</sup>"During the past 2 years, has your state education agency provided any funding for or offered staff development on each of the following topics to those who teach health education? This might include workshops, conferences, continuing education, graduate courses, or any other kind of in-service: (a) personal hygiene, (b) dental and oral health, (c) nutrition and dietary behavior, (d) physical activity and fitness—classroom instruction, not a physical activity period, (e) growth and development, (f) human sexuality, (g) pregnancy prevention, (h) HIV prevention, (i) STD prevention, (j) emotional and mental health, (k) suicide prevention, (l) death and dying, (m) tobacco use prevention, (n) alcohol or other drug use prevention, (o) violence prevention, for example bullying, fighting, or homicide, (p) accident or injury prevention, (q) CPR, (r) first aid, (s) immunizations or vaccinations, (t) sun safety or skin cancer prevention, (u) consumer health, such as choosing sources of health-related information, products and services wisely, or (v) environmental health, such as how air and water quality can affect health?" (State Health Education Questionnaire, Items 39a-v)

<sup>2</sup>Although the SHPPS 2000 questionnaires used the word "accident" because it is familiar to many people, public health officials prefer the word "injury" because it connotes the medical consequences of events that are both predictable and preventable.
